Turn every WhatsApp chat into a sale

WAMA CRM is the WhatsApp AI CRM for Indian businesses: reply in seconds, sell in the chat, send campaigns and support customers, all from one place.

Presented by Magnetora AI Solutions

wamacrm.magnetora.in

Your customers are on WhatsApp. Are you ready?

Late replies

Customers message at night and on Sundays. If nobody replies fast, they buy from someone else.

Chats stuck in phones

Leads sit in different staff phones. When a staff member leaves, their customers go too.

No follow-up

Interested customers are forgotten. Nobody knows whom to call back, or when.

Same questions daily

Price? Timing? Address? The team answers the same things 100 times a day.

Risky bulk messages

Copy-paste broadcasts and unofficial tools can get your WhatsApp number blocked.

No numbers to check

You cannot see how many leads came, who replied, or which offer worked.

How much is this costing you every month?

Example: 300 WhatsApp enquiries a month, average sale ₹2,000

Late or missed replies — ₹36,000

90 enquiries (30%) get no quick reply. 1 in 5 would have bought.

No follow-up — ₹12,000

60 interested leads are never called back. 1 in 10 would have bought.

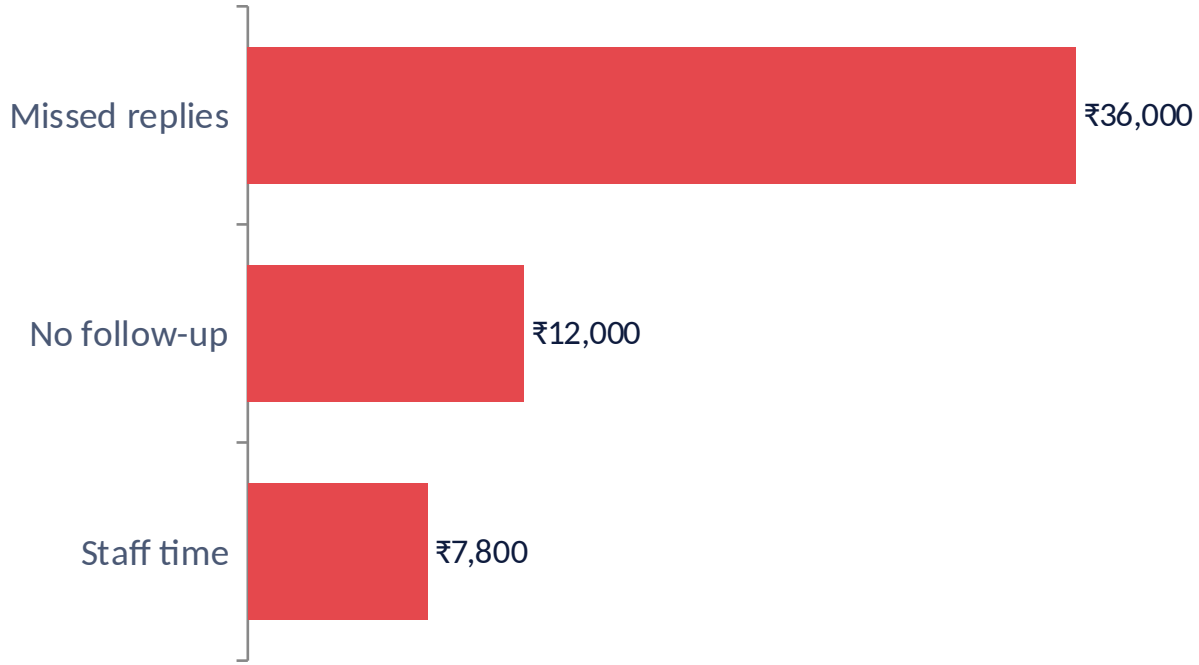

Staff time on repeat questions — ₹7,800

2 hours a day × ₹150 per hour × 26 working days.

Example only. In the demo we will work out your own numbers.

₹55,800

lost every month, about ₹6.7 lakh a year
